SUMMARY

Customer-centered Web Developer, with over 10 years of experience in the Hospitality industry. Blending a deep commitment to exceptional service with robust technical skills, and creating user friendly applications. Ensuring an outstanding user experience in every project with active listening and problem-solving abilities.

WEB DEVELOPMENT PROJECTS

myFlix

Personal Project, CareerFoundry 09/2023 - 12/2023

- Created a RESTful API using Node.js and Express, that interacts with a non-relational database (MongoDB).
- Developed single-page, responsive application, developed with React and React-Redux.
- Implemented user registration, movie search, and favorite list functionalities.

[See GitHub Repo](#)

MEET

Personal Project, CareerFoundry 02/2024 - 03/2024

- Designed a progressive web application with React to display events from Google Calendar, achieving cross-platform functionality and offline availability.
- Led a test-driven-development approach, achieving 95% test coverage with unit and integration tests (Jest), acceptance tests (Cucumber), and end-to-end testing (Puppeteer).
- Utilized serverless functions (AWS Lambda) for user authentication and authorization (OAuth), improving security and scalability.
